 $\begin{array}{l} \textbf{Step 1.} \\ \textbf{Remove front the front left, right, and under body guard cages.} \end{array}$

Step 2.

Using M16 bolts and nuts, attach side arms mounts to combine. Holes are located just behind the front axle.

Step 3.

Mount main tubes to mount arms, bolt together, and center on combine.

 $\begin{tabular}{ll} Step 4. \\ Attach extension arms to main tubes on both sides using u-bolts and nuts. \\ \end{tabular}$

Step 5.

Attach scraper arms to extension arms using u-bolts and nuts.

Step 6.
Attach scraper plates to scraper arm.

Once all plates and arms are in position tighten all nuts and bolts.

Mount all guard cages back into original position.
